

Name: _____

Polygons with MS Paint

Today you're going to use Microsoft Paint to make a picture with polygons.

Launch Microsoft Paint on your computer.

(Click the Windows button on the lower-left of your computer's start up screen. It's in the accessories folder.)

Step 1: Select the triangle tool and make a triangle. Use the paint bucket to color it in. Use the text tool to print words below the shape. Write: "triangle: 3 sides, 3 angles".

Step 2: Select the rectangle tool and make a rectangle on the screen. Use the paint bucket to color it in. Use the text tool to print words below the shape.

Step 3:

Step 4: make a pentagon. use the paint bucket to color it in. use the text tool to label it.

Step 5: Make a hexagon. Use the paint bucket to color it in. Use the text tool to label it.

Step 6: Now select the polygon tool. Use it to make a trapezoid. Be sure your shape is a closed figure. It might be tricky, but do your best. Color it in and label it.

Step 7: Now use the polygon tool to make a parallelogram. Color it in and label it.

Step 8: Now use the polygon tool to make a rhombus. Color it in and label it.

Step 9: Add your name to the picture.

Step 10: Print out your picture.
(You may need to go to *Printer preferences - Effects* and choose "scale to fit page.")
