

Name: \_\_\_\_\_

# The Wright Brothers

Orville and Wilbur Wright were two American brothers who invented and flew the first motorized airplane in the world. The brothers pioneered the first motor-controlled airplane flight in 1903, south of Kitty Hawk, North Carolina. The name of their first powered aircraft was the *Wright Flyer*. After the successful flight of the *Wright Flyer*, the Wright brothers built the *Wright Flyer II* and the *Wright Flyer III*.

Orville and Wilbur's invention was remarkable because they created the first aircraft control system that pilots could use to steer an airplane. The control system helped maintain balance so an aircraft could be flown further and longer. The Wright brothers' invention made the fixed-wing, motorized flights of the modern age possible.
