# Life Cycle Songs

by Liana Mahoney

(Sing to the tune of "My Bonnie Lies Over the Ocean.")

## Frog Life Cycle

A frog starts its life in an egg,  
Then hatches into a tadpole;  
The froglet grows lungs and four legs,  
And then it becomes an adult.

FROG life CY-cle,  
FROG life CY-cle,  
Egg, tadpole, froglet, adult!

FROG life CY-cle,  
FROG life CY-cle,  
Egg, tadpole, froglet, a-dult!

## Ant Life Cycle

An ant starts its life in an egg,  
Then hatches into a larva  
It changes inside a pupa  
And then it becomes an adult.

ANT life CY-cle,  
ANT life CY-cle,  
Egg, larva, pupa, a-dult

ANT life CY-cle,  
ANT life CY-cle,  
Egg, larva, pupa, a-dult!

For other insects that undergo metamorphosis, change the first line of the ant song:

1. A butterfly starts as an egg...
2. A beetle starts as an egg...
3. A bee starts as an egg....
4. A firefly starts as an egg...
5. A ladybug starts as an egg...
