

Bodies of Water Match Game

This game is played like the memory match card game that many children are familiar with. It is designed to reinforce their understanding of bodies of water.

Materials:

Bodies of water name cards and description cards (pages 2-5)

Set up:

Copy the cards on a separate sheet of paper for each student to use at home.

Cut the cards out.

Laminated cards are best.

How to Play:

Lay all of the cards upside-down on the table and mix them up.

Players will flip pairs of cards. They will try to match the landform name to the matching landform definition.

example: The **“waterfall”** card matches the card with **“a place where water flows over a cliff”** on it.

Player 1 flips two cards. If the cards match, he or she gets to keep both cards. If the cards do not match, then the cards are flipped back upside-down.

Then, player 2 gets a turn to try to flip matching cards. Players alternate until all cards have been removed from the game.

When the game is over, the player with the most cards is the winner.

waterfall

strait

bay

ocean
